MANUFACTURER OF THE YEAR FINALISTS: CATEGORY #2: 76-200 EMPLOYEES

ARRAY CONNECTOR CORP.

Array Connector is one of South Florida's fastest growing, vertically integrated manufacturers. From raw material to final assembly, we are committed to U.S. domestic manufacturing. Array designs and manufacturers multi-contact electrical and electronic connectors to both Mil Spec and application specific requirements supplied to some of the world's leading manufacturers of sophisticated original equipment. Our over 500 customers include avionics, defense, transportation, robotics, test and measurement equipment. Quality products delivered on-time with superior customer service is the keystone of Array's growing success. In addition to its team of sales engineers, Array has partnered with a global network of distributors who provide Array's products and local support to their customers. In 2006, we moved into a new modern facility located near Tamiami Airport and more than doubled our manufacturing capacity. Array has benefited from its membership in SFMA and extends thanks for its leadership and help in building manufacturing in Florida.

BROWARD MARINE

Located in Dania Beach, Broward Marine manufactures quality aluminum mega yachts from 120' to 150'. Employing 140, the company also operates a full service repair and refit facility and marina. Broward Marine is committed to producing high quality, leading edge, American-made yachts in the 'Yachting Capital of the World' - South Florida. We have been in continuous production since 1948 when Founder, Frank Denison purchased a boat yard on the New River to build wooden minesweepers for the US and NATO. In the late 1950's, Broward progressed into the private sector, building wooden luxury yachts and sport fish boats. In the late 1970's, Broward switched from wood to aluminum as it continued to earn a reputation for quality and cutting edge technology. Broward Marine has built more motor yachts over 80' than any other American yacht builder and boasts one of the largest fleets afloat of any American Yacht Manufacturer.

DOMETIC ENVIRONMENTAL CORPORATION

Dometic Environmental Corporation, headquartered in Pompano Beach, is the global leader in the development, manufacture and distribution of high-quality marine air conditioning systems for pleasure boats from 22' to over 200' under the Cruisair and Marine Air brand names. Cruisair is a name that has stood for unsurpassed engineering and customer service for more than 45 years, while the Marine Air brand has represented innovation and product leadership for 30 years. Dometic Environmental manufactures the broadest product range in the industry with self contained systems as small as 3500 BTUs and integrated chilled water systems as large as 1,000,000 BTUs. Dometic Environmental is the recipient of the Presidents E Award for export excellence and continues to export 35% of its annual production. Domestically the company serves high profile customers such as Sea Ray Boats and Hatteras Yachts. Dometic's focus on customer service and product innovations has generated a consistent year-to-year double digit growth and sound profitability.

RUNNER-UP

KIRK PHARMACEUTICALS AND ANDAPHARM

Kirk Pharmaceuticals and ANDAPharm became part of Synovics in July 2006. Both are located in Fort Lauderdale. Kirk Pharmaceuticals is a prime manufacturer of high quality OTC and Rx pharmaceuticals as well as dietary supplements. Kirk develops, manufactures and markets formulations for some of the most important retailers and wholesalers in the USA who market these products under their store brand KIRK. Products include a full line of generic over-the-counter medications (i.e., the equivalent of Tylenol® Extra Strength, Sinus and PM, Advil®, Benadryl®, etc.). ANDAPharm has developed several generic prescription products and is introducing them in stages throughout the next two years. ANDAPharm facilities are state-of-the-art, with its own laboratory, blending, compression, and packaging areas, as well as shipping and receiving. Ongoing investment in research and development has put KIRK and ANDAPharm in the light in one of South Florida's hottest industries.

MARLO ELECTRONICS, INC.

Founded by M. Frederick Goddard in 1966, Marlo Electronics, Inc. has produced leading edge printed circuits for over 275 customers worldwide. Marlo's printed circuits are hand-crafted by skilled, experienced employees using state-of-the-art manual and automated equipment. The average Marlo employee has worked for the company over 10 years. Marlo is proficient at making circuits in single, double sided and multi-layers to 14 layers. All of our FR-4 multi-layers are constructed using Isola high temperature TG170 materials. Isola 410 is used in our lead free products. Exotic materials include Polyimide, Arlon, Taconic, Rogers, Teflon's, RTDuroids, RO4000's to 10 layers. Marlo Electronics and subsidiaries service customers such as RF, Wireless, Aerospace, Medical, Communications, Theft Detection and Military industries. Marlo's customer list includes: Siemens, Sensormatic, Motorola, Honeywell, General Dynamics, General Electric, Baxter Medical, L3, Garmin, APA Wireless, Tallacom, Florida RF Labs and Smiths Industries.

ROYAL CONCRETE CONCEPTS, INC.

Wally Sanger founded Royal Concrete Concepts, Inc. (RCC) in 1997 to produce and market concrete relocatable, hurricane resistant, modular buildings. RCC's production facility is in West Palm Beach, Florida, and currently employs over 150 people. RCC also provides certain site preparation services in connection with the delivery of the patented modular buildings. Since inception, RCC has manufactured and delivered over 2,400 modular buildings throughout Florida and the Bahamas. New product lines are continuously being developed and with the devastating hurricanes of 2004 and 2005, demand for all of Royal Concrete products continues to grow. RCC is one of the largest classroom space providers in the state of Florida. Other uses for the patented modular building system (Concretables™) are in the form of: Modular Residential Homes, Military Housing, One and Two Story Classroom Wing Additions, Concrete Portable Classrooms, Park Models, Assisted Living Facilities and Other Commercial Buildings.
